- Jira, Jenkins, Postman, gutbucket, GitHub

EXPERIENCE:

Company: RIA Advisory Philippines

Client: Uber Ads

November 2024 – Present

- Engineered multiple APIs (ad hoc billing, refund, payment cancellation, exchange rate) that streamlined billing workflows, reducing manual processing errors by 15%.
- Developed batch jobs for customer master data extract, billing invoices, trial billing, and failed invoice uploads, improving data accuracy and supporting credit management.
- Authored Technical Design Documents (TDD) and User Test Procedures (UTP), ensuring clear requirements and smooth testing cycles.
- Delivered SQL and CMA scripts supporting multiple release deployments with zero post-release incidents.

Client: IBC – Managed Services Support Group

June 2024 – October 2024

- Analyzed ORMB database tables and developed ad hoc SQL queries to address client requests.
- Developed zone group health checks for Billing, Rates, and General Ledger (GL) across internal and production environments.
- Developed data-fix scripts to address payment records missing Financial Transaction (FT) extensions.
- Investigated and resolved defects related to pricing rule zones.
- Designed User Test Procedures (UTPs) for assigned development tickets.
- Prepared SQL scripts and Configuration Migration Assistant (CMA) files for release activities.

Client: HSBC

April 2023 – June 2024

- Configured custom file request types and performed file validation.
- Developed Data Warehouse (DWH) extract reports using Java and Oracle SQL to support customer and reporting requirements.
- Investigated and resolved defects across internal and production environments.

Rudy Lee Tuprio

(+63) 956-357-0387

rudyleetuprio@gmail.com

- Supported the development of billing algorithms based on business and technical requirements.
- Created user stories related to customer interactions.
- Designed User Test Procedures (UTPs) for assigned tickets.
- Developed zone reports for Customer Reporting, Billing, and Payments.
- Configured extendable lookups for Account Identifier and File Request Type (FRT).
- Prepared SQL scripts and release bundles to support deployment activities.
